

Hospital- Emergency- Room - Analysis

Analyze Emergency Room patient data to understand patient volume, wait times, satisfaction, admission status, demographics, timeliness, and department referral patterns through an interactive dashboard.

KPI'S Requirement

● Number of Patients

Count the total number of patients visiting the ER each day.
Show a daily trend with an area sparkline to spot patterns like busy days or seasonal trends.

● Patient Satisfaction Score

Check the average daily satisfaction score of patients to assess service quality.

Use an area sparkline to show trends, spot drops in satisfaction, and link them to busy times or challenges.

● Average Wait Time

Find the average time patients wait to see a medical professional.

Use an area sparkline to track daily changes and highlight days with longer wait times that might need improvements.

Charts to Create:

Patient Admission Status

Show how many patients were admitted vs. not admitted.

Patient Age Distribution

Show the distribution of patients across different age groups

Timeliness

Show the percentage of patients seen within 30 minutes vs. delayed.

Gender Analysis

Compare the number of male vs. female patients.

Department Referrals:

Identify the departments receiving the highest number of patient referrals.
